

Sports Premium Statement

2015-19

School Vision

At KPJS we believe 'Education is a gift to be given- without exception'. In our school we strive to enable all children to meet their potential; we want to prepare each and everyone of them to take their place in society as responsible citizens. The targeted and strategic use of the Sports premium grant will support us in achieving our vision.

Purpose

The Government introduced the Pupil Premium Grant after the 2012 Olympic Games. This grant is additional to main school funding and seen as a way to help schools address increased sports participation / wellbeing, lifestyle and child obesity. The grant is usually paid direct to schools allowing them to ensure that funding is used to increase participation in sports activities. This year the Government are giving an extra allowance doubling the previous grant to ensure the impact on physical activity in schools is increased and thereby making the nation healthier.

PE and Games at Kenmore Park

Year 3 and 4 classes are allocated at least two sessions of PE and games each week with the exception of Year 5 pupils who attend a regular swimming session for the full academic year and one PE / Games lesson. Year 6 children have one formal PE / Games lesson throughout the year and also attend a three day residential in which they complete a series of outdoor and adventurous activities. On top of this, the school offers a variety of lunchtime and after school clubs with a sports bias. These include multisports, football, dodgeball, cricket, Gifted and talented group, change 4 life, and dance. Some of these activities are specially developed to support children who can find playtime and the playground difficult. We do participate in local competitions with other schools, which include football tournaments and athletics. For the first time ever last year, we competed in the local schools swimming gala.

We also have very good links with our local secondary school, Park High, who not only support our activities but also allows their pupils to fulfil their GCSE sports leadership programme. We also regularly run a whole school competitive sports day to which parents are invited which allows us to promote healthy schools agenda with every family.

These children also have access to our sporting facilities. We run both breakfast and after school club and the children that attend these have access to the play / sports equipment in the school. There is often a 'sports' themed holiday club run by our sports coach.

What has sports premium allowed us to do.

Sports premium has allowed us to have a more strategic approach to PE and Games throughout the school. This has resulted in increased pupil participation and embed high quality provision and obtain the bronze award for school games last year. It also allows us to have innovative sports provision, e.g. Change4life club, fencing club and karate. This stimulates the interest of pupils. In our change4life club older Year 6 pupils are encouraged to become mentors to the younger pupils and to not only encourage them in the session, but also in the playground. We advertise and use some of the children as 'sports leaders' in the playground. They encourage other children to become more active and take part in physical activity.

Previously we have only been able to afford Year 5 pupils to attend swimming lessons for one term. Since the introduction of Sports premium we have been able to increase the number of sessions that pupils attend so that they are able to attend for the full academic year. The impact of this is that many more pupils are achieving the national curriculum standard of 25 metres unaided swimming.

We have invested in taking the children to 'Forest School'. All the Year 3 children go on this trip as well as selected pupils from other year groups who go once a week for a six-week period. This meets part of the outdoor and adventurous PE curriculum.

This year we have embarked on a new playtime programme, OPAL, (Outdoor Play and Learning). We are hoping that as a result of the programme children become much more physically active at playtimes, use their own creative ideas more and move away from just the traditional playground aims. This is one of the key elements in the school's School Improvement Plan.

Impact

Over 150 pupils take part in additional activities both at lunchtime and after school. Many of these pupils are attracted to the innovative provision. For example, we have introduced 'Disco Club', at lunchtime to encourage active play. The only thing that limits more clubs taking place is the physical space of the school grounds.

All Year 6 attend school journey where they take part in a range of physical activities that also encourage team work and co-operation and ensures that our outdoor education requirements are met.

Without Sports premium we could not meet the needs of G + T pupils through additional PE / Games sessions.

We are currently investigating if it is possible to team up with some of the private schools in the area so that our pupils may have access to their facilities.

All pupils take part in PE / Games activities and any pupils who have a disability are catered for in those sessions. The schools ethos is very inclusive and the school will provide extra provision for any pupils that needs extra support.

PE is mainly taken by specialist staff who are up to date with their current practice through a range of professional training.

Cross-curricular Links

Wherever possible we try to combine our PE / Games curriculum with other aspects of the curriculum so that the children's learning is embedded through a range of learning techniques. For example, Year 5 children do a topic called 'Fit for life'. In the science part of this topic the children learn about how to keep healthy, how the major organs of the body work etc. In PE / Games, the children complete a class marathon over a few weeks showing how exercise can help keep the body healthy.

Swimming

Number of pupils in current Yr 6 who were also in Yr 5: 85

Number of pupils who swim 25 metres: 39

Number of pupils who can use a range of strokes effectively: 39

Number of pupils who can perform safe self-rescue in water: 31

A number of factors have direct impact on the figures above:

1) This cohort have had the opportunity to attend swimming lessons throughout the year. This is a result of the school allocating additional resources to swimming (extra cost of staffing/coaches) via the Sports Premium fund.

2) In all previous years, pupils had only attended swimming for one term. It was felt this was ineffective in terms of the pupils attaining the targets above and that before Sports Premium funding; the school was not able to extend these swimming slots.

3) Very few pupils have access to swimming beyond the school curriculum.

Achievements

- Obtained the Bronze Award for School Games, (externally assessed).
- Attended a 'girls only' football festival to celebrate the opening of the women's World Cup and promote girls in football.
- One child will be travelling with Harrow Gymnastics club to attend a 3 day competition in Malta
- Approximately 40% of Year 5 pupils managed to achieve 25m swimming, (more than ever before).

- Won a Gold medal in the vortex at Borough Athletics competition.
- Had world class athlete in to speak to and encourage the pupils.

Future Plans

- Implement OPAL programme
- Speak to infant school about allowing access to different after school clubs so that the children have more variety.
- We would like to increase the number of competitions that we enter
- We want to put on a week where we promote Change4life agenda
- We want to increase girls participation in after school clubs
- We are investigating the possibility of having more parental participation in physical activities to promote well-being.
